

Tvingsbjerg

It is a W house on the shore. When 0.5M off turn S for Assens leaving the main channel and its R buoy to stb. Pass midway between the NCM Asnæs Rev and the shore to Assens 0.5M ahead

ASSENS to FABORG(Sjælland)

Lights:

0988 Helnæs 55°8.0N 958.7E FI 5s 30m 16/12/12M sect

To leave Assens, it is wise to sail 0.5M NNE to round the NCM into the main channel. Pass 0.2M W of Toro, do not attempt to go inside the island. There are no dangers to yachts, Helnæs Lt Ho can be passed close in 5m as can Sønderhøj. Lyø may be passed to N or S being careful to pass E of the ECM marking the eastern extremity of Lyø Sand. It is essential to identify the R buoy N of Avernakø and leave this to port. From this a course of 353° leads E of egrund shoal marked by a G buoy. At the 2nd G buoy alter to 046° towards Idgø, in 1.8M alter course to 336° to pass a R buoy before entering Fiborg. Anchorage: 300m S of Dyreborg 3.5M SSW of Fiborg Sand, 4m.

FABORG to SOBY(årø)

Lights:

1070 Skjoldnæs 54°58.2N 10° 12.5E LFI W 30s 32m. 20M

One possible route would be to retrace steps to the NCM Skrams, Flak S of Lyø and then to sail S leaving the W tr of Skjoldnæs to stb. There are no noteworthy hazards. An alternative would be to use the inshore passage E of Bjørnø. From FABorg steer 135° for 2.3M to the 4 RG buoys marking the 3m channel over the Grydeløb reef, altering course to 145° an ECM will be left clear to stb and R buoy to port before rounding Nakkeodde to pick up the RG buoys at the E end of Avernakø. A course of 225° 4.6M will lead to Soby clear of the WCM marking the dangerous rock W of Drejø.

FABORG to SVENDBORG(Fyn) and the STORE BæLT

Steer 135° through the Grydeløb Reef, then 142° 2.4M to the R buoy 1M N of Nakkeodde from here a deep channel E runs into Svendborg Sund.

SVENDBORG(Fyn)

Passage Notes: W of the 33m bridge there is a mid-channel shoal, keep to the S side of the channel until the yacht harbour at Vindeby is abeam. Beyond the town, the buoyed channel winds S with a series of transits and SE of Thuro it enters deep water between Fyn and Langeland. Anchorage: NW coast of Tasinge in the bay 0.8M E of Vomms Pynt. Sand and Weed. Change direction of buoyage: At Svendborg bridge

SOBY to ÅROSKOBING(årø)

No special hazards. It is essential to locate the SWM at the start of the approach channel. Anchorage: Revkrog Bay S and E sides. 4m sand.
